for safe storage

# Easy maintenance of green spaces and parks

Mobile systems for irrigation, cleaning, weed control

## Simply save time when watering

Efficient water supply using CEMO irrigation systems

Watering can be quite simple: Our mobile solutions free you from water connections, limited hose lengths and heavy watering cans. A recent example: Our latest innovation is the new Aqua transfer trolley which holds 150 litres of water, and thanks to its swivel castors it can be comfortably moved around inside a building.

The easy handling makes watering child's play in hotels, shops or clinics as examples. The Aqua transfer trolley fits perfectly into our product world for mobile watering: You set the location, we have the solution – from the GRP tank system with a capacity of up to 13,500 litres to the Aqua-Caddy, the featherweight for up to 60 litres.

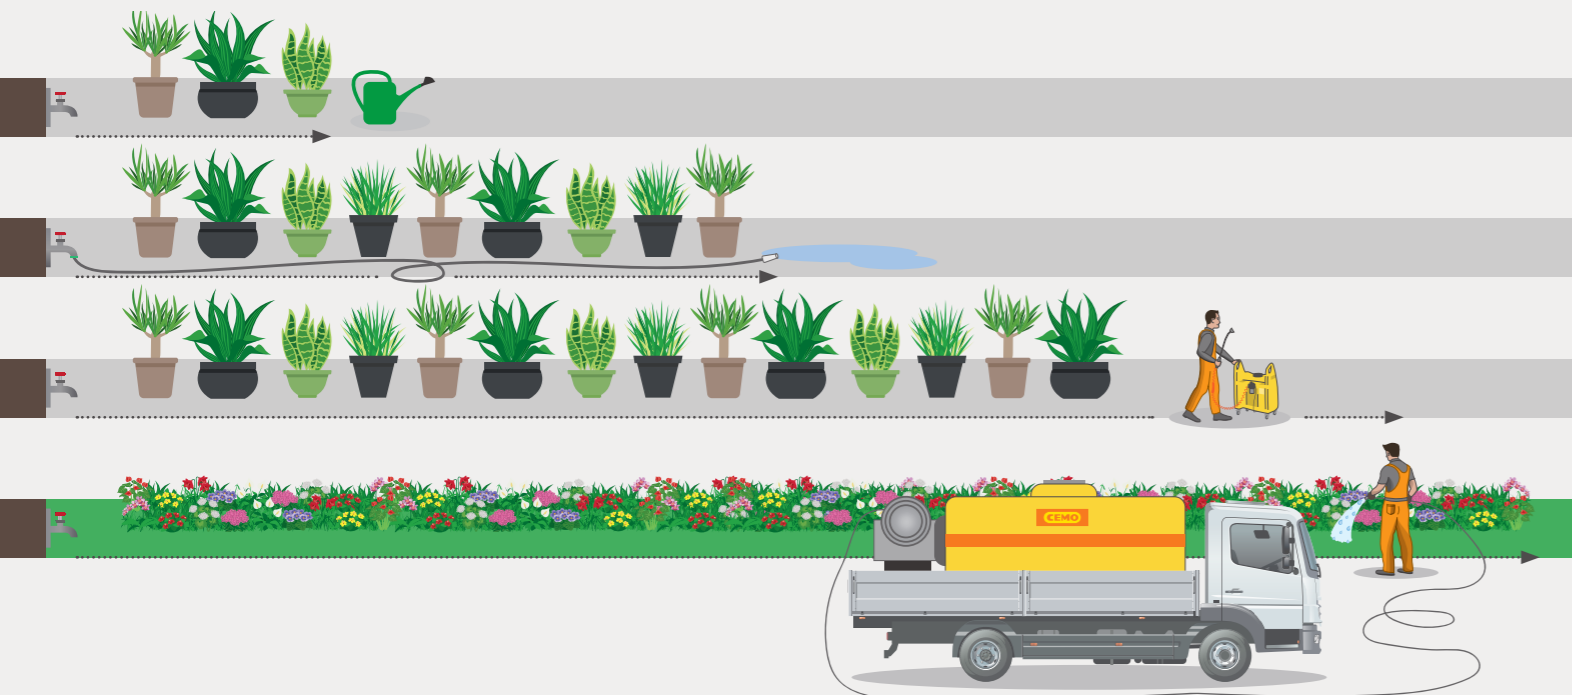

With CEMO you are in safe hands: our solutions, which are manufactured in Germany, are renowned for high quality and proven materials and accessories, giving you the assurance of a long service life.

Quality that protects  
– the environment  
and your company.

## The solution that will get you many more litres

Time is money, even when watering and irrigating. That's why our solutions offer two key advantages: more reach and always as much water as you need.

### We will be happy to advise you!

You can find all the information at [www.cemo-group.com](http://www.cemo-group.com)  
Or give us a call to discuss your individual requirements.

## CEMO – Solutions for safe storage

### Sustainability

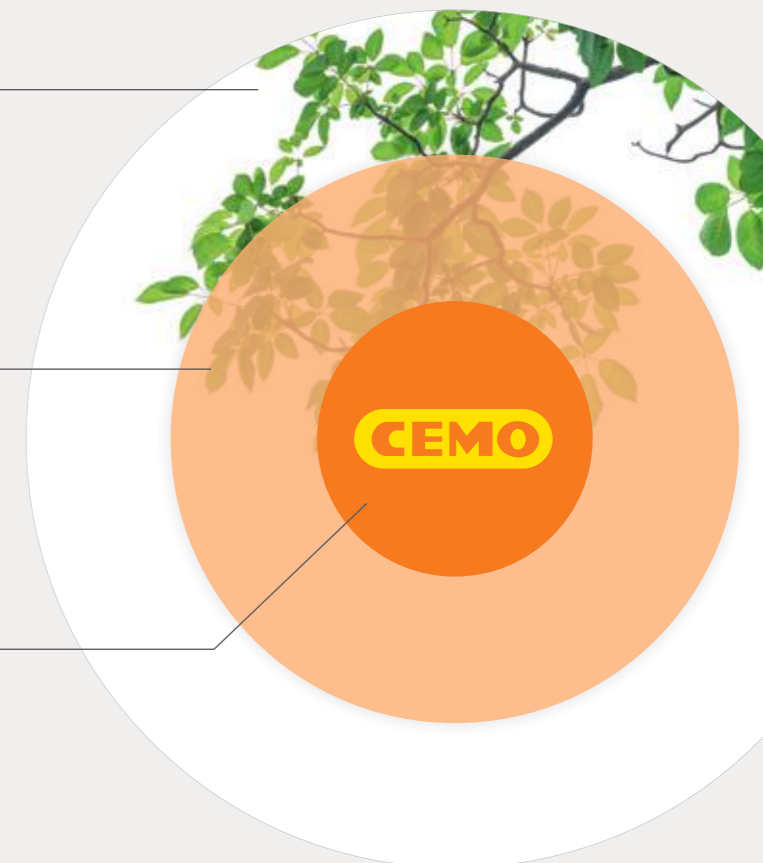

Durable and well designed: We take environmental protection and legal requirements into account when developing our products.

### Quality

Premium materials and the highest quality workmanship make the storage of your hazardous materials efficient and economical.

### Experience

Products with added value, competent technical advice, extensive training: With CEMO, you get everything from one source.

# The fast way to lush green

In a park or in an office building: When the sun is blazing, short distances are required for watering. We make sure that you don't leave any plant high and dry – with flexible solutions for watering, cleaning and weed control.

## MCS 1000 HD

Cleaning and weed control with high pressure and high temperature – mobile, transport-safe and without the need for a electricity or water connection.

## BWS 130 and 500

The irrigation duo for universal demands: from 600 to 13,500 litres, easy to attach and transport. Wide range of accessories.

## BWS 25 and 30

Box-shaped tanks made of high-quality PE with integrated baffle for reduced liquid movement during transport. Capacity 125 to 600 litres.

## Transfer Trolley Aqua

For rapid use in buildings: 150 litre container made of high-quality translucent PE with integrated fill level scale. Easy handling thanks to integrated handles and castors.

## Aqua-Caddy

Extremely quiet and compact system with 60-litre capacity, ideal for off-road use.

## Mobile irrigation in buildings: Transfer Trolley Aqua

The new freedom in watering – efficient thanks to its 150-litre tank

The new Aqua transfer trolley ensures that you effortlessly transport water in the building – totally mobile, without a hose and cable. This is particularly practical when watering plants in multi-storey buildings – whether offices, hotels or hospitals. Thanks to the castors, the trolley is easy to move – from floor to floor, from hallway to hallway and from plant to plant.

- ✓ 150-litre container made of high-quality translucent PE with integrated handles and fill level scale
- ✓ Low centre of gravity
- ✓ Integral pump sump allows the container to be emptied almost entirely
- ✓ Quick coupling with water stop for Gardena systems
- ✓ Spray head with various spray settings
- ✓ Self-priming electric pump with battery and 10m spiral hose

## Short distances, more convenience: mobile irrigation in the field

Irrigation systems for professional and private use

Garden and green spaces under control: Use CEMO solutions for efficient outdoor irrigation to save time and achieve optimum care of green areas and plants without electricity or a water connection.

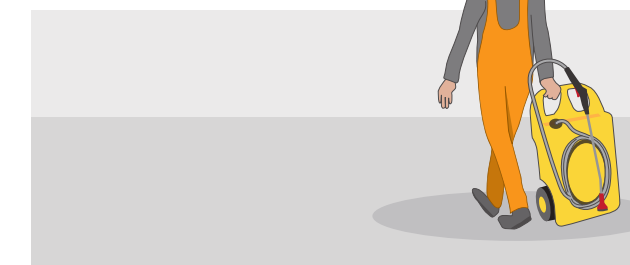

For example with the Aqua-Caddy, the complete 60-litre system for smaller outdoor areas. The Aqua-Caddy is compact, easily manoeuvrable and of high quality – it couldn't be more convenient.

The lightweight BWS 25-PRO PE and BWS 30-PE can be placed wherever water is needed. After use, they can be easily moved to where they will be used next.

We make large-scale mobile watering possible for municipalities, gardeners and landscapers or service providers – with the BWS 130 and BWS 500 systems, and the BWS 130-PE.

### Aqua-Caddy

- ✓ Extremely quiet
- ✓ Battery with charger
- ✓ Quick coupling with water stop for Gardena systems
- ✓ 6m water hose
- ✓ Spray lance with watering spray head

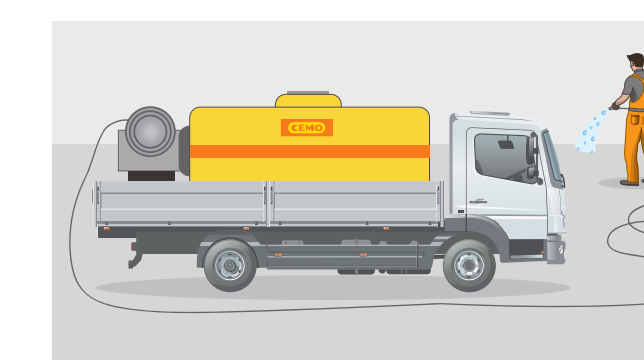

### BWS 25 and 30

- ✓ Rectangular PE tanks with integrated baffle for safe transport
- ✓ 125 to 600 litre capacity
- ✓ Made of high-quality, age-resistant and recyclable polyethylene (PE)

### BWS 130 and 500

- ✓ Tanks with 600 to 13,500 litre capacity
- ✓ Safe due to robust construction and with flexible configuration
- ✓ BWS 130 and BWS 500 made of glass-fibre reinforced plastic (GRP), making it permanently durable and corrosion-free

## Mobile cleaning and weed control: MCS 1000 HD

High-pressure, high-temperature convenience for clean conditions

Whether dirt or weeds, the MCS 100 HD will keep even large areas clean – without a connection to the mains or water supply. The system fitted with a PE drum and Kärcher high-pressure module is easy to transport. It comes with an attachment kit for weed control, the temperature sensor ensures a constant water temperature of 98 degrees Celsius at the outlet of the lance. Alternatively, a weed control lance for chemical-free removal is available as an option.

- ✓ PE drum with baffle for 600, 1,000 or 2,000 litres
- ✓ Skids, support device and fastening straps for safe transport
- ✓ Heated Kärcher high-pressure module HDS 1000 De with high-pressure gun
